Experience & Equipment to Keep Fluids Moving!

Fluid-Power Equipment, Inc. began in 1973 providing the drilling, producing, refining and petrochemical industries with fluid pumping, handling and separating equipment. Our history has been marked by success-success as a pump, pump parts, separator distributor, and success as a custom fabricator of pump packages in use worldwide. Fluid-Power Equipment has gained international recognition as a company which offers complete service and support. From start to finish, we are equipped to serve all of your liquid handling needs: we consult and design custom packages, procure, assemble, test, install, and of course offer service and support as required. Quality control and customer support have enhanced Fluid-Power Equipment's reputation as a responsive company. Our people are dedicated to providing quality equipment in a timely manner at a fair price. With over one hundred years combined experience in the field, our management team is fully competent to service your needs. We are professionals excited about our industry and its constant challenges. When you have a need, let us demonstrate how we rise to the occasion, providing experience and equipment to keep fluids moving.
